Cumulative Index
Nutrition Today

Volumes 1 (1966), 2 (1967), 3 (1968), 4 (1969)

M — March
J — June
S — September
D — December
Sp — Spring
Sum — Summer
Atmn — Autumn
Wntr — Winter
ed. — editorial

Pertinent illustrative materials, e.g., medical illustrations, charts, graphs, etc., have been included in the index and are indicated by illus. following the entry. Major articles are listed in italics.

Teaching aids. An asterisk indicates a teaching aid is available on this subject. For details, see v.4, Atmn 69, 2. A complete listing of teaching aids may be found under the heading, *Teaching Aids*.

SUBJECT INDEX

A

ABSORPTION
amino acids, v.2, M67, 7.
calcium, effect on cocoa, v.2, M67, 28.
carbohydrate, illus., v.2, M67, 5-7.
  glucose, (glucose pump), v.2, M67, 6-7.
  fructose, v.2, M67, 6.
  12-carbon disaccharides, v.2, M67, 7.
carrier-mediated diffusion, hypothetical function, v.2, M67, 4.
effect of hypertonic and hypotonic meals on gastrointestinal function, study, v.2, M67, 6.
fat, mechanism of, illus., v.2, M67, 8-9.
faulty, illus., v.3, S68, 2-10; screening tests for, v.3, S68, 8.
**For want of an enzyme. illus., v.3, S68, 2.*
**Gastrointestinal absorption. illus., v.2, M67, 2.*
interdependence of processes, v.3, S68, 9-10.
iron
  ironstat, v.2, M67, 7.
  factors influencing, v.4, Sum 68, 3, 17.
magnesium, v.2, S67, 18-19.
malabsorption, illus., v.3, S68, 2.
persorption, discussion of phenomenon at Seventh International Nutrition Congress, v.1, S66, 23.
physiology of, v.2, M67, 3-9.
pinocytosis, v.2, M67, 8.
water
  faulty, in sprue, v.3, S68, 6.
  transport through cell membrane, illus., v.2, M67, 5.
water-soluble nutrients, v.2, M67, 6-8.
zinc, v.3, M68, 16.
ADIPOSE TISSUE
memory mechanism in regulation of food intake, v.1, J66, 5.
ADOLESCENT
Adolescent obesity. v.1, D66, 2.
Nutrition guidelines for teenagers. v.2, M67, 22.
obesity, see Obesity
Society for Adolescent Medicine formed, v.3, S68, 20.
AGING
effect on pigment accumulation, illus., v.2, D67, 6.
fats, unsaturated, effect of radiant energy on, v.2, D67, 2-5.
process of, v.2, D67, 2-9.
**Where old age begins. illus., v.2, D67, 2.*
vitamin deficiency in, resulting optic-nerve damage, v.3, M68, 7-8.
ALCOHOLISM
chronic, magnesium deficiency associated with, v.2, S67, 19.
vitamin deficiency in, resulting optic-nerve damage, v.3, M68, 7-8.
ALLIUM TRICOCCUM
see Ramps
AMERICAN JOURNAL OF CLINICAL NUTRITION
transfer of publication franchise, ed., v.1, D66, 11.
AMINO ACIDS
absorption of, general mechanisms, v.2, M67, 7.
essential
  daily requirement for, illus., v.3, D68, 22.
  individual physiological needs for, v.2, D67, 21.
in parenteral feeding, v.3, D68, 23.
requirements; observed ranges, illus., v.2, D67, 22.
ANEMIA
Association between symptoms and hemoglobin levels, in Wales, v.4, Sum 69, 15; effect of treatment on symptoms, v.4, Sum 69, 15.
Differential diagnosis of anemia in children. illus. v.3, M68, 21.
in children
  causes of, in infants, v.3, M68, 22-23.
  differential diagnosis, v.3, M68, 21-24.
  in the newborn, v.3, M68, 22-23.
  in the school child, v.3, M68, 24.
in the United States, findings of the National Nutrition Survey, 1968, v.4, Sp 69, 11.
iron deficiency, v.4, Sum 69, 14-19.
pernicious, malabsorption of vitamin B_{12}, v.2, M67, 7-8.
state of, definition, based on concentration of hemoglobin in blood, v.4, Sum 69, 15.
The vital distinction. v.4, Sum 69, 14.
ANTARCTIC
geographical explorations, v.4, Atmn 69.
nutritional support, problems of, v.4, Atmn 69, 34-36.
Priestley, Sir Raymond, diary of, v.4, Atmn 69, 18-27.
voyage to, account of, v.4, Atmn 69, 28-36.
ANTIOXIDANTS, BIOLOGICAL
in aging process, protective role of, v.2, D67, 5-7.
APPETITE
hypothalamic control of, v.1, J66, 4.
AQUACULTURE
potential of, nutritional benefits, v.1, S66, 6.
ARKANSAS CHILDREN'S HOSPITAL
feeding program, v.2, J67, 17-20.
ASCORBIC ACID
deficiency, scurvy, case studies, v.1, S66, 20-22; v.4, Sum 69, 20-21.
effect on physical performance of athletes, v.1, M66, 20-23.
effect of refrigerated storage on, v.1, M66, 24.
from orange juice, compared to synthetic vitamin C, research on, v.1, M66, 22-23.
in aging process, protective role of, v.2, D67, 6.
in diet of athletes, v.1, M66, 20-24; v.3, J68, 6-7.
in human physiology, importance of, v.2, D67, 6.
in space nutrition, v.2, J67, 9.
levels
  in seals, v.4, Atmn 69, 22.
  in U.S., National Nutritional Survey, v.4, Sp 69, 7-8.
natural vs. synthetic, differences, v.1, M66, 24.
Recommended Dietary Allowances, reduction in, v.3, D68, 17-19.
Tolerance Test
  oral loading, in tests for scurvy, v.1, S66, 21.
What made the Russians run? v.1, M66, 20.
Yakovlev, research on requirements, v.1, M66, 20.
ASTRONAUTS
see United States Space Program
ATHEROSCLEROSIS
dietary sucrose as cause of, v.4, Sp 69, 16-20.
in experimental animals, role of diet, v.1, D66, 20.
predisposing factors, v.4, Sp 69, 16-17.
ATHLETES
food eaten, illness caused by, v.3, J68, 17-20.
recommended diet for, v.3, J68, 10-11.
What made the Russians run? v.1, M66, 20.

B

BEEUKWES, ADELIA
nutritionist, death of, v.2, D67, 9.
BERI-BERI
elimination of with thiamine-enriched rice, in Philippines, v.2, J67, 14-15.
research on preventive substance (thiamine) by R. R. Williams, v.2, J67, 14-15.
BIGUANIDE PHENFORMIN
in treatment of diabetes-obesity, proposed, v.1, S66, 19.
BILE SALTS
conjugation of, in sprue, v.3, S68, 6.
importance in fat absorption, v.2, M67, 8.
BIOCHEMICAL INDIVIDUALITY
We abnormal normals. illus., v.2, D67, 19.
BIOFLAVONOIDS
in treatment of colds and prevention of bruises, v.1, M66, 24.
BIRTH DEFECTS
Babylonian predictions, based on, v.3, D68, 10.
fetal impoverishment resulting in, v.3, D68, 2-9.
infant deaths due to, v.3, D68, 9.
Consequences of fetal impoverishment, v.3, D68, 2.
BLINDNESS
To eat to see. v.3, M68, 2.
in children, due to faulty nutrition, v.3, M68, 2-8.
patterns of, in wealthy nations vs. poorer nations, v.3, M68, 2-3.
percentage of population of South Korea and California afflicted with, v.3, M68, 6.
BLOOD
levels
  inadequacy of term "normal," v.4, Sum 69, 15.
  of zinc, v.3, M68, 15.
  serum, carotene levels in, v.3, S68, 8.
red cell mass, deficit, in astronauts, v.2, J67, 9.
BODY
measurement of lean mass, method, v.3, J68, 7.
BODY FLUIDS
composition of, v.1, D66, 17.
distribution of water, illus., v.1, D66, 17.
BODY WEIGHT
and caloric intake, as a function of physical activity in man, illus., v.1, J66, 7.
BOOK REVIEWS
"Essays on History of Nutrition and Dietetics." American Dietetic Association, v.2, D67, 24.
"Food and Nutrition." William H. Sebrell Jr. et al, v.2, S67, 13.
"Review of Japanese Literature on Beri-Beri and Thiamine." ed. by N. Shimazono and E. Katsura. v.2, S67, 11.
"The Physician." Russel V. Lee et al, v.2, S67, 13.
"You Are Extraordinary." Roger J. Williams, v.2, D67, 7.
BREAKFAST
Breakfast in Sealab II. illus., v.1, M66, 2.
importance of, comments by Malvern Reeve, MD, v.1, J66, 19.
inadequate, effect of, v.2, M67, 23.
BRONFMAN PRIZE
American Public Health Association. Dr. Moises Behar recipient of, acceptance speech, v.3, D68, 11.

C

CALCIUM
deficiency, effect of, in the elderly, v.1, J66, 18.
effect of cocoa on, v.2, M67, 28.
increased intake, on low magnesium diet, hypomagnesemia associated with, v.2, S67, 18.
individual requirement for, range of, v.2, D67, 21; v.3, D68, 19.
intracellular disposition of, associated with magnesium deficiency in rats, v.2, S67, 19.
provisions for, in diet of U.S. astronauts, v.2, J67, 9.
CALORIC INTAKE
and body weight, as a function of physical activity in man, illus., v.1, J66, 7.
of wealthy vs. poorer countries, v.4, Sp 69, 17.
CAMP SEASCAPE
Adolescent obesity, v.1, D66, 2.
camp organization, v.1, D66, 3-4.
encouragement of eating patterns at, v.1, D66, 4-5.
guidelines for teenagers, modifications of instructional leaflet, v.2, M67, 22-27.
program for treatment of adolescent obesity, v.1, D66, 2-9.
program plan, v.1, D66, 4-6.
program results, v.1, D66, 5-6.
typical group, v.1, D66, 2-3.
weight distribution tables of participants, v.1, D66, 5.
CAMPBELL, J. ALEXANDER
named to Editorial Advisory Board, v.4, Sp 69, 13.
CAMPBELL SOUP COMPANY
joint sponsors of NUTRITION TODAY, v.3, J68, 12.
CARBON CYCLE
in nature, illus., v.2, S67, 17.
CARBOHYDRATES
absorption
  in sprue, v.3, S68, 5-6.
  of 12-carbon disaccharides, v.2, M67, 7.
dietary, and increased physical activity, v.3, J68, 10.

effect on blood lipid elevation, v.4, Sp 69, 18-19.
ethanol in parenteral feeding, v.3, D68, 22.
fructose
absorption of, v.2, M67, 6.
in parenteral feeding vs. glucose, v.3, D68, 22.
glucose
absorption of (glucose pump), v.2, M67, 6-7.
glucostatic mechanism, v.1, J66, 4-5.
in parenteral feeding, disadvantages, v.3, D68, 21-22.
influence on food intake, v.1, J66, 4.
oxidation of, during physical activity, v.3, J68, 5-6.
glycogen
effect on physical endurance in man, v.3, J68, 10.
metabolism, during physical activity, research, v.3, J68, 10.
intake, in U.S. and U.K., average, per person, v.4, Sp 69, 17.
loading, in physical exertion, v.3, J68, 5.
sorbitol
use in parenteral feeding, v.3, D68, 22.
Sucrose and heart disease. v.4, Sp 69, 16.
xylitol, in parenteral feeding, v.3, D68, 22.
CAROTENE
blood levels, effect of in sprue, v.3, S68, 8.
CARPENTER, SCOTT
in United States Navy, Operation Sealab, v.1, M66, 4.
CASTLE, WILLIAM BOSWORTH
winner of 1966 Joseph Goldberger award in clinical nutrition, contribution of, v.1, S66, 22.
CASTLE'S INTRINSIC FACTOR
vitamin B_{12} carrier in absorption, v.2, M67, 7-8.
CELIAC SPRUE
see Sprue, celiac
CELL
ash, (clinker)
analysis of, v.2, D67, 5.
effect on aging process, v.2, D67, 5.
formation of, v.2, D67, 5.
changes in, resulting from sprue, v.3, S68, 3-4.
concentration of granular age pigments in section of dorsal ganglion, illus., v.2, D67, 7.
fluids, presence of magnesium in, v.2, S67, 16.
growth, impairment of, in zinc deficiency, in laboratory animals, v.3, M68, 14.
lysosomes, damaged, effect of, v.2, D67, 5.
importance of polyunsaturated lipids in food supply for, v.2, D67, 3.
mitochondria, vulnerability to lipid peroxidation, v.2, D67, 4-5.
nutritional needs, individuality of, v.2, D67, 22-23.
physiology of, in aging process, principles, v.2, D67, 3.
pigment granules accumulated in horn cell cytoplasm, illus., v.2, D67, 7.
reticulum, vulnerability to lipid peroxidation, v.2, D67, 4-5.
**Where old age begins. illus., v.2, D67, 2.*
CHILDREN
anemia in
in the newborn, v.3, M68, 22-23.
in the premature infant, v.3, M68, 24.
major causes of, v.3, M68, 22.
diet instruction for, at Arkansas Children's Hospital, v.2, J67, 19-20.
Differential diagnosis of anemia in children. illus., v.3, M68, 21.
myopia in, suggested relationship to malnutrition, v.3, M68, 3.
salmonella infection in, pets as source of, v.2, S67, 7.
vision, effect of faulty nutrition on, v.3, M68, 2-9.
CHILI (food)
first annual Chili Bowl, (Gourmet Scientist) v.2, D67, 10-13.
CHLOROPHYLL
chemical structure of, illus., v.2, S67, 17.
CHOATE, ROBERT B.
in White House Conference on Food, Nutrition and Health, v.4, Wntr 69, 4-5, 6.
CHOLERA
theoretical role of sodium pump in, v.2, M67, 5.
CHOLESTEROL
blood levels
dietary experiments in man, v.1, D66, 20.
effect of reduced fat diet, v.2, M67, 19.
guide to risk of heart attacks, v.1, D66, 21-22.
in rats, rise in with increase of dietary sodium chloride, v.1, D66, 18.
CIGARETTE SMOKING
choice of cholesterol-rich foods by smokers, v.2, M67, 16.
in heart-disease prone, v.4, Sp 69, 18.
CITRUS JUICE
see also Ascorbic acid
in the diabetic diet, use, v.1, M66, 24.
nutrients in, effect of processing on, v.1, M66, 24.
COCOA
effect on calcium absorption, v.2, M67, 28.
CONGENITAL MALFORMATIONS
see Birth defects
CONTAMINANTS, ENVIRONMENTAL
in Operation Sealab, problems of, v.1, M66, 6.
CONTRACEPTIVES
oral, effect on lactation, v.2, M67, 28.
COOK, CAPTAIN JAMES
first practicing nutritionist, v.4, Atmn 69, 8-16.
COPLEY MEDAL
illus., v.4, Atmn 69, 9.
CORONARY
see Heart disease
CRETE
site of diet and heart disease study, v.1, D66, 19-20.
CZECHOSLOVAKIA
daily diet, average components of, v.1, S66, 23.
relationship of meal patterns to obesity, v.1, S66, 23.

D

DBI
see Biguanide phenformin
DEATHS
Beeuwkes, Adelia M., v.2, D67, 9.
Frazer, Alastair, v.4, Sum 69, 28.
Funk, Casimir, v.2, D67, 9.
McCollum, E. V., v.2, D67, 9.
Pearson, William N., v.3, D68, 10.
DEFICIENCY DISEASES
(see also individual listing of nutrients)
**How to diagnose nutritional disorders in daily practice. illus., v.4, Sum 69, 20.*
DENTITION
factor in geriatric malnutrition, v.1, J66, 17.
DES MARAIS, ANDRE
vitamin C research, v.1, M66, 20-21.
DIABETES
classification and terminology of, based on new concepts, illus., v.1, S66, 17.
Diabetes-obesity or Obesity-diabetes? v.1, S66, 16.
dietary treatment of, principles, v.1, J66, 24.
inadequacy of term, v.1, S66, 17.
lack of effective insulin action as a cause of, theories, v.1, S66, 17.
obesity, as a stage of, v.1, S66, 16-19.
oral hypoglycemics, concession therapy, v.1, S66, 19.
DIAGNOSIS
**How to diagnose nutritional disorders in daily practice. illus., v.4, Sum 69, 20.*
importance of patient history in, v.4, Sum 69, 21.
DIET(S)
and heart disease, study conducted on Crete, v.1, D66, 19-20.
and physical performance, Issue, v.3, J68.
American, iron content of, v.4, Sum 69, 3.
awareness of, by health professionals, v.1, M66, 17.
cholesterolotropic substances in, other than fatty materials, v.1, D66, 20-21.
effect of, on glycogen stores and physical endurance, illus., v.3, J68, 11.
effect of, on prenatal development, v.3, D68, 2-9.
for athletes, recommendations, v.3, J68, 10-11.
hospital
Through a child's eye seeing. v.2, J67, 17.
Doctors' dietary antics. v.3, S68, 21.
iron content of, factors influencing absorption of, v.4, Sum 69, 17.
mental development related to, ed., v.1, M66, 11, 18.
therapeutic
cardiac patients, diet problems among, v.1, M66, 16.
causes of failure in, v.1, M66, 15.
considerations
of ethnic origins in, v.1, M66, 14.
of hunger and satiety in, v.1, J66, 8.
gastric regimen, current use of, v.1, J66, 24.
in diabetes, with atherosclerotic complications, principles, v.1, J66, 24.
instruction, at Arkansas Children's Hospital, v.2, J67, 19-20.
sodium-restricted
dietary considerations, v.1, D66, 24.
in lowering blood pressure, v.1, D66, 18.
salt restricted, difficulties with, v.1, M66, 17.
standardized, origins of, v.1, M66, 18.
well-balanced, concept of, v.3, J68, 5.
DIETETICS
diet prescription, misunderstanding of, among physicians, examples of vague orders, v.3, S68, 21-24.
DIGITALIS
poisoning, associated with potassium deficiency, v.3, M68, 19.
toxicity, from anorexigenic drugs, v.3, M68, 18.
DISEASE
deficiency
discussion of, at Seventh International Nutrition Congress, v.1, S66, 15.
in the elderly, v.1, J66, 18.
laboratory signs of, v.4, Sum 69, 26.
physical signs of, v.4, Sum 69, 22-25.
food- and water-borne, in athletes, v.3, J68, 17-20.
infectious, in the malnourished, v.1, S66, 15.
DIURETICS
factor in potassium deficiency, v.1, J66, 21.
DOG FOODS
source of salmonellosis, v.2, S67, 7.
DONALDSON, LAUREN R.
experimentation with fish autolysate, v.1, S66, 2-8.
DRUGS
anorexigenic
administration and tolerance of, v.2, D67, 17-18.
anorectic effect induced by, v.2, D67, 15.
Anorexigenic drugs . . . boon or bust? illus., v.2, D67, 14.
definition of, distinction from combination drugs, v.2, D67, 17.
discussed, v.3, J68, 24-25.
guide to proper use of, illus., v.2, D67, 17.
in treatment of obesity, illus., v.2, D67, 15.
misuse of, v.2, D67, 15-16.
most commonly used, v.2, D67, 17.
status and future of, v.2, D67, 18.
The fatal interaction. v.3, M68, 18.
testing of, on experimental animals, v.2, D67, 14-15.
use of with the neurotic, v.2, D67, 17.
selected, contraindicated for nursing mothers, v.2, M67, 28.
DUST
source of salmonella contamination, v.2, S67, 7.

E

EGGS
common carriers of salmonella, v.2, S67, 6.
preparation of, in Operation Sealab, v.1, M66, 6.
ELECTROLYTES
alteration of, during space flight, v.2, J67, 10.
replacement, in parenteral feeding, v.3, D68, 21.
ELECTRON MICROSCOPE
use of, in tracing absorbed fat, v.2, M67, 9.
EMOTION
effect of on food intake, v.1, J66, 5.
ENERGY EXPENDITURE
effect of on food intake, v.1, J66, 5; v.3, J68, 9-11.
ENVIRONMENTAL CONTAMINANTS
see Contaminants, environmental
ENZYME
activity, in malabsorption, illus., v.3, S68, 2.
carbonic anhydrase, see Zinc metallo-enzymes
**For Want of an Enzyme. v.3, S68, 2.*
systems, function of magnesium in, v.2, S67, 17.
EXPLORATION
The Explorer and His Food, Issue, Atmn 69; commentaries, v.4, Wntr 69, 22.
EYE
Bitot's spot, illus., v.3, M68, 3; v.4, Sum 69, 23.
conjunctiva
effect of vitamin A deficiency on, v.3, M68, 5.
xerosis of the, illus., v.3, M68, 3; v.4, Sum 69, 23.
corneal
damage, in vitamin A deficiency, v.3, M68, 5.
vascularization, attributed to deficiency of B complex vitamins, v.3, M68, 7.
keratomalacia, illus., v.3, M68, 3, 5.
myopia, in children, suggested relationship to malnutrition, v.3, M68, 4.
optic nerve degeneration, result of nutritional deficiency, v.3, M68, 7.
refractive errors in, illus., v.3, M68, 5.
rod cells, photochemical function, related to vitamin A, v. 3, M68, 5.
To eat to see. v.3, M68, 2.
toxoplasmosis, in the newborn, result of raw meat consumption by mother, v.3, J68, 25.
visual handicaps, due to faulty nutrition, v. 3, M68, 2-8; illus., v.4, Sum 69, 23.

F

FAT
absorption, mechanism of, illus., v.2, M67, 8-9.
allowances, in diet of athlete, recommended caloric percentage of, v.3, J68, 6.
blood levels, effect of carbohydrate on, v.4, Sp 69, 18-19.
consumption of, in U.S., average, v.4, Sp 69, 18.
dietary
percentage of, in average U.S. diet, v.2, M67, 19.
principal form of, v.2, M67, 8.
restricted, effect on cholesterol, v.2, M67, 8-9.
digestion, v.2, M67, 8-9.
emulsion, overloading syndrome in parenteral feeding, v.3, D68, 24.
monoglycerides, absorption of, v.2, M67, 8.
peroxidized
occurrence of, in heart muscle, v.2, D67, 5.
presence of, in age pigments, v.2, D67, 5.
polyunsaturated
cell need for, v.2, D67, 3.
dietary, desirable ratio to saturated, v.2, D67, 3.
effect of radiant energy on, in aging, v.2, D67, 2-5.
peroxidation of, illus., v.2, D67, 4.

synthetic, medium-chain, use in malabsorption syndromes, v.2, M67, 9.
transport of, illus., v.3, S68, 7.
triglycerides,
absorption of, v.2, M67, 8-9.
blood levels, in low fat diet, v.2, M67, 16.
intestinal synthesis of, v.2, M67, 7, 8; illus., v.3, S68, 4-9.
use of in parenteral feeding, v.3, D68, 23.
FATTY ACIDS
see also Fat, triglycerides
effect of differing chains on blood cholesterol levels, v.1, D66, 20.
in sprue, binding calcium ions, v.3, S68, 4.
percentage of, in average American diet, v.2, D67, 3.
serum levels, in the obese, after physical exertion, v.1, S66, 15.
FISH
autolysate
effect on growth of fingerlings, v.1, S66, 3.
substitute for breast milk, v.1, S66, 3.
hake, component of fish autolysate in Donaldson studies, v.1, S66, 3.
mineral deficiency in, results of, v.1, S66, 4.
nutrient cycle in, illus., v.1, S66, 9.
ocean
abundance of minerals in, v.1, S66, 3.
in fish autolysate, desirability of, v.1, S66, 3.
salmon
breeding of, in University of Washington program, v.1, S66, 7; v.3, M68, 19.
fingerlings, in nutrition research, v.1, S66, 4-6; v.3, M68, 19.
trout, as experimental animals in nutrition research, v.1, S66, 5.
FLOUR
enriched, in U.S., iron levels of, v.4, Sum 69, 18.
poor absorption of iron salts from, v.4, Sum 69, 18-19.
FOOD(S)
additives
in agricultural products; in animal nutrition, discussion of. Seventh International Nutrition Congress, v.1, S66, 23-24.
in United States, restrictions on, v.1, S66, 24.
and physical performance, v.3, J68, Issue.
and the explorer, v.4, Atmn 69, Special Issue.
basic four groups, v.2, M67, 23-24.
Breakfast in Sealab II, illus., v.1, M66, 2.
dietetic, in treatment of adolescent obesity, v.1, D66, 4.
Dinner on the moon. v.4, Atmn 69, 37.
flight qualification demands for, in United States space program, v.2, J67, 3.
for space flights, early use of, v.2, J67, 3.
fortification, inadequacy of programs, v.4, Sp 69, 10-11; v.4, Sum 69, 18.
handlers, as salmonella carriers, v.2, S67, 7-8.
in Sealab, kinds, v.1, M66, 6-8; preparation, v.1, M66, 7.
intake
factors influencing, v.1, J66, 5, 8.
influence of hypothalamus on, v.1, J66, 3-4.
Luncheon in space. v.2, J67, 2.
selection by the elderly, factors affecting, v.1, J66, 15-18.
supply, in U.S. during crises, v.1, S66, 24.
FOOD POISONING
see Salmonellosis
Incident at Selby junior high school. v.2, S67, 2.
FOOD SERVICE
for United States Olympic teams, v.3, J68, 21-23.
FRAZER, ALASTAIR
physician, dir.-general, British Nutrition Foundation, death of, v.4, Sum 69, 28.
FRUIT JUICE
effect on absorption of iron salts, v.4, Sum 69, 18.
FUNK, CASIMIR
vitamin researcher, death of, v.2, D67, 9.

G

GASTROENTERITIS
in athletes, reports of, v.3, J68, 18-20.
chronic, loss of magnesium during, v.2, S67, 14.
symptoms of, in salmonella infection, v.2, S67, 3.
GERIATRIC NUTRITION
see Nutrition, Geriatric
It's not age that interferes with nutrition of the elderly. v.1, J66, 15.
GINGIVAL LESIONS
improved after vitamin C therapy, illus., v.1, S66, 21.
GLYCOGEN
and physical endurance, illus., v.3, J68, 10-11.
GOITER
iodized salt in prevention of, v.4, Sp 69, 22-25.
prevalence among girls of child-bearing age, in United States, v.3, D68, 4.
GOLD-HEADED CANE
recipients of, since 1952, v.3, D68, 15.
symbol of culture and art in medicine, v.3, D68, 14-15.
GOURMET SCIENTIST
A Romp Amongst the Ramps, v.4, Sum 69, 10.
Aboard Queen Elizabeth II, v.3, S68, 15.
An Air Force Dining-In, v.3, J68, 14.
Chili Bowl, v.2, D67, 10.
Dr. Russel V. Lee cooks baked salmon Baronda, v.1, S66, 12.
visits N. Y. Yacht Club, v.1, M66, 13.
visits Stock Yard Inn, v.1, J66, 13.
GRAVITY
absence of, affecting choice of food for United States space programs, v.2, J67, 6; effect on in-flight food preparation, v.2, J67, 8.
in Gemini flights, physical effects, v.4, Atmn 69, 42.
GREECE
dietary patterns in, v.2, M67, 14.
GRIFFITH, WENDELL
nutritional science, inconsistency in, [Geiger Memorial Lecture], v.1, M66, 11.

H

HALE, FRED
studies on effect of nutrition on mammal development, v.3, D68, 4.
HEART DISEASE
as complication of atherosclerosis, v.2, M67, 15.
attempts at primary and secondary prevention, in U.S., v.2, M67, 19; v.4, Sp 69, 19.
carbohydrate loading in, v.4, Sp 69, 20.
decline in death rates from, during World War II, v.2, M67, 18-19.
obesity associated with, v.2, M67, 15.
prevalence in Africa, Crete, Finland, Israel, Italy, Japan, U.S., related to diet, v.1, D66, 19-23.
prevention, controllable influences, v.2, M67, 15.
related to physical activity; race and heredity; stress, v.1, D66, 23.
Sucrose and heart disease. v.4, Sp 69, 16.
HELIUM ATMOSPHERE
effect on eating patterns, Sealab, v.1, M66, 6-8.
HEMOGLOBIN
levels, in United States sample population, National Nutrition Survey, v.4, Sp 69, 7.
levels and anemia symptoms, v.4, Sum 69, 15.
molecule, composition of, v.4, Sp 69, 2; illus., v.4, Sum 69, 3.
HOITINK, A. W.
vitamin C effect on work performance, v.1, M66, 21.
HOLT, L. EMMETT JR.
recipient of McCollum Award, v.3, J68, 16.
HORMONE(S)
adrenal cortical, factor in potassium deficiency, v.1, J66, 20; in sodium conservation, v.1, D66, 17-18.
insulin
lack of effective action as a cause of diabetes, theories of, v.1, S66, 17.
levels of, in coronary heart disease, result of carbohydrate loading, v.4, Sp 69, 20.
"therapy of last resort" in treatment of diabetes-obesity, v.1, S66, 19.
HUNGER
and satiety, therapeutic considerations of, v.1, J66, 8.
effect on glucose utilization, v.1, J66, 4.
prevalence of, discussed at the Seventh International Nutrition Congress, v.1, S66, 14.
Why people get hungry. v.1, J66, 2.
HYPERTENSION
associated with sodium intake, v.1, D66, 18.
identifying characteristics of, v.1, D66, 24.
HYPOTHALAMUS
glucostatic mechanism, v.1, J66, 4.
lesions, effect on food intake, v.1, J66, 3.
mouse, effect of gold thioglucose on, illus., v.1, J66, 5.
regulatory mechanism of, in food intake, v.1, J66,4.
study on breaking activity of, v.1, J66, 4.

I

IODINE
recommended dietary allowance, v.3, D68, 19.
IODIZED SALT
Iodized salt. v.4, Sp 69, 22.
INSULIN
see Hormones
INTESTINE
absorption
carbohydrate, illus., v.2, M67, 5.
"For want of an enzyme. illus., v.3, S68, 2.
"Gastrointestinal absorption. illus., v.2, M67, 2.
interdependence of processes, v.3, S68, 9-10.
magnesium, v.2, S67, 18-19.
physiology of, v.2, M67, 3-9.
zinc, v.3, M68, 2-10.
anatomy of, v.2, M67, 2-3.
bulk flow, equalizing osmotic pressure, v.2, M67, 4.
carrier-mediated diffusion, hypothetical, v.2, M67, 4.
Doing without the intestine. illus., v.3, D68, 20.
epithelial cells, illus., v.2, M67, 3.
electron micrograph of, illus., v.2, M67, 10.
function of, v.2, M67, 3.
in physiology of absorption, v.2, M67, 3.
jejunum
bacterial growth in, in sprue, v.3, S68, 6.
porous quality of, v.2, M67, 3.
motility disorder, in sprue, v.3, S68, 6.
solvent drag in, v.2, M67, 4.
water transport through cell membrane, illus., v.2, M67, 5.
villi, light microscopy, illus., v.2, M67, 2.
IRON
absorption of, v.2, M67, 7.
factors influencing, v.4, Sum 69, 15, 17.
intracellular, control of, illus., v.4, Sum 69, 4.
cycle, in body, illus., v.4, Sum 69, 4.
deficiency
anemia, v.4, Sum 69, 14-19.
causes of, in infants, v.3, M68, 23-24.
in infancy, v.3, M68, 22-23.
in the school child, v.3, M68, 24.
in U. S. women, v.4, Sum 69, 3.
sequence of events associated with, v.4, Sum 69, 6.
studies in Wales, v.4, Sum 69, 15-17.
dietary
associated with body iron levels, v.4, Sum 69, 17.
factors influencing absorption of, v.4, Sum 69, 17.
endogenous, regulating erythropoiesis, v.4, Sum 69, 5.
functional, body content of, v.4, Sum 69, 5.
in body, levels of, v.4, Sum 69, 2.
in hemoglobin molecule, importance, v.4, Sum 69, 2.
Iron metabolism. illus., v.4, Sum 69, 2.
levels of, in enriched bread, v.4, Sum 69, 18.
overload, causes of, v.4, Sum 69, 7.
physiological loss of, v.4, Sum 69, 2-3.
requirements, v.3, D68, 18-19.
salts
effects of fruit juice on absorption of, v.4, Sum 69, 18-19.
in bread, poor absorption of, v.4, Sum 69, 18-19.
supply, adequate, evaluation of [methods], v.4, Sum 69, 6.
transport of, v.4, Sum 69, 5.

J

JAPAN
cholesterol levels, v.1, D66, 23.
dietary patterns in, v.2, M67, 14.

culture plates, illus., v.2, S67, 3-4.
gastroenteritis, symptoms of, associated with, v.2, S67, 3.
in athletes, v.3, J68, 17-20.
Kauffman-White technique for identification of, v.2, S67, 4.
major health problem, v.2, S67, 3.
"Salmonella Salad," recipe for, v.3, J68, 19.
serotypes, environmental factors supporting growth of, v.2, S67, 5.
SALMONELLOSIS
cases reported, in 1951, 1965, v.2, S67, 3.
dog food, source of, v.2, S67, 7.
frequent source of food infection, v.2, S67, 3.
Incident at Selby junior high school. v.2, S67, 2.
increase in incidence, factors affecting, v.2, S67, 8.
most common isolates from, v.2, S67, 5.
occupational hazard, in food handlers, v.2, S67, 7.
SALT
early use of, by man, v.1, D66, 16.
human requirement for, v.1, D66, 18.
intake
associated with hypertension, v.1, D66, 18.
determination of, v.1, D66, 18.
iodized
declining use of, v.4, Sp 69, 22-25.
in prevention of goiter, v.4, Sp 69, 22-25.
Iodized salt, v.4, Sp 69, 22.
on icebreaker *Southwind*, v.4, Atmn 69, 31.
SATIETY
and hunger, therapeutic considerations of, v.1, J66, 8.
function of hypothalamus in, v.1, J66, 3-4.
SCURVY
clinical manifestations of, two case studies, v.4, Sum 69, 20-21.
grass, illus., v.4, Atmn 69, 13.
laboratory signs of, v.4, Sum 69, 26.
physical signs of, illus., v.4, Sum 69, 23.
polar expeditions' precautions, v.4, Atmn 69, 6-7.
possible effect of on mouth, v.4, Atmn 69, 27.
prevention of, during voyages of Captain James Cook, v.4, Atmn 69, 10-16.
Scurvy developing during therapy for psychoneurosis. v.1, S66, 20.
SEALAB, OPERATION
see United States Navy Operation Sealab
SENESCENCE
see Aging
SKOOG, F.
early investigations on mechanism of growth failure in zinc deficiency, v.3, M68, 14.
SODIUM
bodily conservation of, during periods of total depletion, v.1, D66, 17.
dietary, clinical aspects of, v.1, D66, 18.
extracellular positions of, index of level of osmotic activity of water in tissue, v.1, D66, 17.
in body fluids, v.1, D66, 17.
reabsorption of, competitive with magnesium and calcium, v.2, S67, 19.
restricted diets, v.3, S68, 23-24.
serum concentrations, maintenance of, v.1, D66, 17.
Sodium. A most extraordinary dietary essential. v.1, D66, 16.
transport, in intestinal absorption, v.2, M67, 4-5.
values, in fruits, vegetables and juices, illus., v.1, J66, 22.
SPACE-FLIGHT PROGRAM
see United States Space Program
SPRUE, CELIAC
changes in cell structure during, v.3, S68, 3.
conjugation of bile salts in, v.3, S68, 6.
destruction of intracellular enzymes resulting from, v.3, S68, 4.
effect of fatty acids in, v.3, S68, 4.
impaired water absorption in, v.3, S68, 6.
motility disorders in, v.3, S68, 7-8.
steatorrhea in, v.3, S68, 4.
total malabsorption caused by, v.3, S68, 2-3.
STARVATION
in weight reduction, disadvantages of, v.1, J66, 24.
STEAK
cooking instructions for, v.1, J66, 14.
cuts of, illus., v.1, J66, 14.
in Olympic diets, v.3, J68, 22-23.
STEATORRHEA
sprue-induced, v.3, S68, 4.
STRESS
effect of, in space flight, v.2, J67, 9.
effect on coronary rate, v.1, D66, 23.
foods, effect on physical endurance, v.3, J68, 9-11.
SUCROSE
Sucrose and heart disease. v.4, Sp 69, 16.
SUMMA IZBU
Babylonian clay tablet, predictions based on birth of malformed children, partial, v.3, D68, 10.

T

TASTE
factor in food intake, in absence of hypothalamic regulatory mechanism, in rats, v.1, J66, 6-7.
sensitivity tests, as conducted at University of Texas at Austin, v.2, D67, 19-21.
TEACHING AIDS
availability of, v.4, Atmn 69, 2.
"Gastrointestinal Absorption."
"Intestinal Malabsorption."
"Iron Metabolism."
"Nutrition Diagnosis."
"Where Old Age Begins."
TEXAS
participant in National Nutrition Survey, v.4, Sp 69, 3-4.
TRANSPORT, ACTIVE
adenosinetriphosphate, as source of energy in, v.1, D66, 17.
mechanism
association of magnesium with, v.2, S67, 17.
in electrolyte balance, v.1, D66, 17.
sodium pump in intestinal transport of sodium, v.2, M67, 4-5.

U

ULCER
peptic
diet for, principles, v.1, J66, 24.
UNDERWEIGHT
dietary treatment of, v.1, J66, 24.
UNITED KINGDOM
carbohydrate intake, average, per person, v.4, Sp 69, 17.
Sheffield experiment, innocuous effect of vitamin A-free diet reported, v.2, D67, 21.
Welsh studies with iron fortification, v.4, Sum 69, 14-17.
UNITED STATES
carbohydrate intake, average, per person, v.4, Sp 69, 17.
dietary intake
American attitude toward, v.2, M67, 14.
and high adult mortality rate, v.2, M67, 15.
fat percentage in, v.2, M67, 19.
fat intake, average, per person, v.4, Sp 69, 18.
food supply, during crises, forecast, v.1, S66, 24.
general health of malnourished population, v.4, Sp 69, 9-10.
National Nutrition Survey
Are we well fed? . . . The search for the answer. v.4, sp 69, 2.
clinical findings
biochemical results, v.4, Sp 69, 7-8.
dental findings, v.4, Sp 69, 7.
dental condition of participants, illus., v.4, Sp 69, 9.
dietary data, v.4, Sp 69, 8-11.
height and age relationships for boys five years of age and under, illus., v.4, Sp 69, 10.
laboratory findings, percentage of population with less than adequate nutrient levels, illus., v.4, Sp 69, 6.
malnutrition, causes of, v.4, Sp 69, 10-11.
National Nutrition Survey, v.4, Sp 69, 2-11.
Olympic teams, food service for, v.3, J68, 21-23.
Senate, select committee on nutrition and human needs, v.4, Sp 69, 4.
White House Conference on Food, Nutrition and Health
see also White House Conference on Food, Nutrition, and Health.
announcement of meeting and panel members, v.4, Atmn 69, 45.
disputes over Conference's proper focus, v.4, Wntr 69, 3-14.
final plenary session, v.4, Wntr 69, 12-13.
opposition groups, v.4, Wntr 69, 8-11, 12-13.
Hitched to everything in the universe: the White House conference on food and nutrition. v.4, Wntr. 69, 2.
President Nixon's letter of announcement to NUTRITION TODAY, v.4, Atmn 69, 44.
UNITED STATES AIR FORCE
"Dining-In," v.3, J68, 14-15.
UNITED STATES ARMY
Natick laboratory, meal development in U.S. space program, v.2, J67, 3; v.4, Atmn 69, 40.
UNITED STATES COAST GUARD
Ed. trip to Antarctica on icebreaker *Southwind*, v.4, Atmn 69, 28-33.
UNITED STATES NAVY
McMurdo Base, description and foods at, v.4, Atmn 69, 33-36.
Operation Sealab
Breakfast in Sealab II. v.1, M66, 2.
capsule, environment of, physical problems caused by, v.1, M66, 5, 9.
diet planning for, v.1, M66, 8.
eating patterns of participants, v.1, M66, 6.
food preparation, eating problems, v.1, M66, 4-8.
helium atmosphere, effect on eating patterns of team members, v.1, M66, 6-8.
improvements planned for, v.1, M66, 10.
medical tests conducted on team members, v.1, M66, 9.
nutritional objectives of, v.1, M66, 5-6.
"saturation dive," v.1, M66, 9.
Sealab III, plans for, v.1, M66, 10.
vital signs of team members, illus., v.1, M66, 8.
UNITED STATES SPACE PROGRAM
Apollo missions, nutritional problems of, v.2, J67, 11; v.4, Atmn 69, 37.
Apollo Applications Program, Saturn V orbital workshop, illus., v.4, Atmn 69, 40, 41.
Apollo XI mission
food packaging for, illus., v.4, Atmn 69, 38.
food supply for, v.4, Atmn 69, 37-42.
astronauts
daily caloric distribution for, v.2, J67, 4.
red cell mass deficit in, v.2, J67, 9.
weight loss during flight, v.2, J67, 8.
benefits of, ed., v.2, J67, 15.
biochemical determinations during space flight, v.2, J67, 10.
diet, calcium fortification of, v.2, J67, 9.
Dinner on the Moon, illus., v.4, Atmn 69, 37.
electrolytes, alteration of during space flight, v.2, J67, 10.
flight log, illus., v.2, J67, 10.
flight mission, weight loss during, illus., v.2, J67, 8.
food
Christmas dinners, v.4, Atmn 69, 40.
criteria for, v.4, Atmn 69, 39.
freeze-dried, illus., v.2, J67, 4.
packaging, v.2, J67, 5.
selection, v.2, J67, 7-8.
specifications for, v.2, J67, 3.
synthetic, avoidance of, v.2, J67, 6-7.
gravity, effect on foods, v.2, J67, 6.
Luncheon in space. v.2, J67, 2.
meal planning for, v.2, J67, 2-11.
nutrition support system in, v.2, J67, 11.
nutritional knowledge of, effect on further space developments, ed., v.2, J67, 13.
stress, in flight, effect of, v.2, J67, 9.
UNIVERSITY OF WASHINGTON
program to develop pollution-resistant salmon, v.1, S66, 6-7.

V

VENISON
suggestions of preparation for cooking, v.1, D66, 13.
VISION
see also Eye
defects, due to malnutrition, international problem, v.3, M68, 6-7.
effect of malnutrition on, v.3, M68, 2-8.
night blindness
occurrence in select groups of people, v.3, M68, 5.
treatment of, with vitamin A, v.3, M68, 7.
VITAMIN
allowances, recommended, v.3, D68, 18-19.
transport, illus., v.3, S68, 7.
VITAMIN A
deficiency
effect of, on cornea, v.3, M68, 5.
effect of, on conjunctiva, v.3, M68, 5.
individual requirements, range of, v.2, D67, 21; v.3, D68, 18.
relation to photochemical function of ophthalmic rod cells, v.3, M68, 5.
requirements of laboratory rats for, research on, v.2, D67, 21.
serum levels, United States population sample, National Nutrition Survey, v.4, Sp 69, 7.
Sheffield experiment, v.2, D67, 21.
VITAMIN B_1 (THIAMINE)
allowances, recommended, v.3, D68, 18.
and beri-beri in Japan, v.2, S67, 11.
levels, United States population sample, National Nutrition Survey, v.4, Sp 69, 7.
research on, in search for beri-beri prevention, by R. R. Williams, v.2, J67, 14-15.
VITAMIN B_2 (RIBOFLAVIN)
allowances recommended, v.3, D68, 18.

levels, United States population sample, National Nutrition Survey, v.4, Sp. 69, 7.
VITAMIN B_6
first recommended allowances for, v.3, D68, 17-19.
VITAMIN B_{12}
absorption, illus., v.2, M67, 7.
allowances, recommended, v.3, D68, 18.
deficiency of, in celiac sprue, v.3, S68, 6.
malabsorption, in pernicious anemia, v.2, M67, 7-8.
specialized absorptive mechanism, v.2, M67, 7-8.
VITAMIN B COMPLEX
deficiency, effect on vision, v.3, M68, 7.
VITAMIN C
see Ascorbic acid
VITAMIN E
fad, v.3, J68, 20.
first recommended allowances for, v.3, D68, 17-19.
importance of, in space nutrition, v.2, J67, 9.
present knowledge of, v.2, D67, 6.
preventive role in aging process, v.2, D67, 2-3, 6.
requirements of, v.2, D67, 6.

W

WALKING
distances required to neutralize caloric intake from certain foods, illus., v.2, M67, 26.
WATER
body
absorption, factors dependent upon, v.2, M67, 6.
faulty, in sprue, v.3, S68, 6.
retention
cause of failure in obesity treatment, v.2, D67, 16-17.
WEIGHT
loss
during United States space flights, illus., v.2, J67, 8, 10; v.4, Atmn 69, 40.
reduction
choice of treatment in diabetes-obesity, v.1, S66, 18.
importance of patient instruction in, v.2, D67, 16.
plan for, at Camp Seascape, v.2, M67, 23.
pills, v.3, M68, 18-19; see also Drugs, anorexigenic.
WHITE HOUSE CONFERENCE ON FOOD, NUTRITION AND HEALTH — Issue, v.4, Wntr 69.
